**FEATURED SKILLS**
JavaScript, React, Ruby, Rails, PostgreSQL, jQuery, Node.js, AWS, git, Heroku, CSS / HTML

**OTHER SKILLS / EXPERIENCE**
Python, Java, Swift, C#, FCP, Photoshop, Unity, Premiere, Motion, Illustrator, Electron

## EXPERIENCE

**Freelance**, New York, NY — *Developer*
August 2015 - Present
- Created webapps, websites, mobile apps, video games, multimedia content, and commercials.
- Language agnostic -- had to build in a wide range of frameworks and technologies from frontend to backend solutions.

**Emberlabs**, New York, NY — *Web Developer / Contractor*
November 2016 - Present
- Built out wireframes with jQuery and React.
- Designed the Rails API that manages the auto-translations between languages of SRT files.
- Created original spec video content.

**Founder House**, New York, NY — *Head of Community*
June 2015 - September 2016
- Upgraded and maintained a single-page Rails app and PostgreSQL database that handled the application / member pipeline (average of 400 new applications monthly).
- Created new branding, design, and video elements weekly as the business scaled.
- Trained seven managers across four properties and curated event planning for 200+ members.

## FEATURED PROJECTS

**Watchlist**                                    [Github | Live]
- Login with Facebook OAuth, search against a film API, and keep track of what you like, hate, or haven't seen. Single-page app built with React and Rails.

**Sudoku Solver**                                [Github | Live]
- Built with JavaScript and jQuery.
- Focused on a DRY functional solution with deep board cloning and recursion.

## EDUCATION

**American University**, Washington, DC — *BA*
January 2011 - May 2013
- Minor in Computer Science. Classes included: Database Structures, Computer Networks, and a Capstone: Image/Video Processing using Python
